

Francesca CARDINALE

place and date of birth: Turin (IT), 25 February 1970
citizenship: Italy
address: DISAFA, University of Turin
L.go P. Braccini 2 10095 Grugliasco (TO) Italy
tel. +39.011.6708875
fax +39.011.2368875
e-mail francesca.cardinale@unito.it
ORCID: orcid.org/0000-0001-9892-9325
h-index (Google Scholar 3/2022): 22

ACADEMIC QUALIFICATIONS:

7/92 Bachelor of Science with honours degree (110/110 *cum laude*) at Turin University
11/93 Italian State qualifying examination in Biology
11/96 Awarded Doctor of Philosophy degree in Biology (Corso di Dottorato in Biologia e Biotecnologia dei Funghi)
9/00–10/08 Research associate in Plant Pathology at DiVaPRA, University of Turin
10/08–06/15 Research associate in Plant Physiology at DISAFA, University of Turin
11/18 "Abilitazione Nazionale" to Full Professor in Plant Physiology

PRESENT APPOINTMENT:

since 03/23 Appointed member of the "Commissione AQ" (DISAFA quality assurance, in charge of the Research area)
since 10/17 Member of the "Commissione monitoraggio e riesame" for the CdS Tecnologie Alimentari, formerly "Commissione Carriere" for the CCLI in Tecnologie Alimentari e Viticoltura ed Enologia
since 07/15 Associate Professor in Plant Physiology at DISAFA, University of Turin
since 09/09 Erasmus programme, DISAFA contact person for Lisbon (PT)

TEACHING EXPERIENCE/TUTORING:

since 11/00:
-*Biotechnologies in phytopathology*, University of Turin, Faculty of Agronomy, Master's degree in Biotecnologie Agrarie Vegetali
-*Plant physiopathology*, University of Turin, Faculty of Agronomy, Master's degree in Agroecologia
-*General biology and plant physiology* University of Turin, Faculty of Agronomy, Laurea degrees in Tecnologie Alimentari, Viticoltura ed Enologia
- *General and food-plant biology*, Laurea degree in Tecnologie Alimentari (current)
11/09 *Physiologie moléculaire végétale* Université de Bourgogne, Dijon (France). Enseignante invitée - Host: Prof. A. Pugin
09/15 *Hormonal perception, signalling and cross-talk in molecular plant-microbe interactions and responses to abiotic stress* cycle of seminars. University of Vilnius, Lithuania – Host: Prof. I. Meskiene

Direct scientific and experimental supervision of undergraduate (19 "Tesi di Laurea Magistrale" already defended in Agriculture, Biology, Biotechnologies) **and graduate students** (7 Theses in "Biology and Biotechnology of Fungi" or "Agricultural, Forest and Food Sciences" already defended, one ongoing). Scientific supervisor of several exchanging PhD students (from foreign countries) during secondment periods.

RESEARCH EXPERIENCE:

9/00–10/07 Research associate in Plant Pathology, DiVaPRA, University of Turin
Work subject: Molecular mechanisms of cross-protection between biotic and abiotic stress
Post-transcriptional regulation of ethylene biosynthesis
Phosphorylation events upon elicitor treatment
9/98–9/00 Post-doctoral fellow at the Institut für Mikrobiologie und Genetik,

	Biozentrum Dr. Bohrgasse, Wien (Austria)
<i>Supervisor:</i>	Prof. H. Hirt
<i>Work subject:</i>	MAP kinase signalling in plant-microbe interactions
3/97-6/98	Post-doctoral fellow at the Centre de Biologie et Physiologie Végétales, Université Paul Sabatier, Toulouse (France)
<i>Supervisor:</i>	Prof. M.T. Esquerré-Tugayé
<i>Work subject:</i>	Molecular mechanisms in plant-microbe interactions; the octadecanoid pathway
11/93-11/96	PhD student, DiVaPRA, University of Turin (Italy)
<i>Supervisor:</i>	Prof. A. Matta
<i>Thesis:</i>	"Ricerche sul ruolo patogenetico di xilanasi fungine: loro caratterizzazione ed effetti elicitori"
<i>Dissertation:</i>	July 10, 1997
10/94-9/95	Exchanging graduate student at the Weed Science Laboratory, USDA ARS, Beltsville (MD) USA
<i>Supervisor:</i>	Dr. J.D. Anderson
<i>Work subject:</i>	Physiology of plant responses to fungal elicitors
9/92-9/93	Training at the Plant Physiopathology laboratory (DiVaPRA, University of Turin)
<i>Supervisor:</i>	Prof. A. Matta
<i>Work subject:</i>	Enzymatic elicitors of resistance within the <i>Capsicum annuum-Phytophthora capsici</i> interaction

STAGES:

15-27/5/00

Plant responses to biotic and abiotic stress: molecular mechanisms and implications for agriculture. *NATO-Advanced Study Institute, FEBS, NSF Roscoff* (France)

25/2-1/3/02

Abiotic stresses in the soil-plant system. *SICA, Portoferraio (LI) Italy "Statistical analyses of biological data" Bioinformatics school 2006 – Fondazione per le Biotecnologie*, Turin

12-14/06/06

THIRD MISSION:

Co-founder of StrigoLab Srl, a spin-off of Turin University whose mission is to synthesize and distribute bioactive organic molecules among which the phytohormones strigolactones (www.strigolab.eu). Inventor on patent application no. 102019000019739 ("Composizione biostimolante e suo impiego in agricoltura") submitted on 24/11/2019, granted on 28/09/2021 as patent N. 102019000019739.

FUNDING (past 10 years):

HORIZON-CL6-2022-ZEROPOLLUTION-01-03 - Innovative concepts and technologies for Ecologically sustainable nutrient management in agriculture aiming to prevent, mitigate and eliminate pollution in soils, water and air (ECONUTRI). *42 months, participant, Task leader*

H2020-SFS-2018-2020 - Realising dynamic value chains for underutilised crops (RADIANT). *48 months, Participant as UniTO leader*

KIC-EIT food Innovation 2020 – Innovative biostimulants for sustainable fruit production from vegetable crops (BIOSUVEG), *12 months, Participant (UniTO coordinator)*

H2020 PRIMA Multi-topic 2018, 1.2.1 - Adapting Mediterranean vegetable crops to climate change-induced multiple stress (VEG-ADAPT). *36 months, WP co-leader (UniTO coordinator)*

MANUNET Transnational Call 2017 - Development of a demonstrator to produce next generation plant biostimulants based on root exudates (DEMETRE) Project No. [MNET17/NMCS-0034]. *24 months, Participant*

H2020-SFS-01-2016 - A novel and integrated approach to increase multiple and combined stress tolerance in plants using tomato as a model (TOMRES) Grant Agreement No. [727929]. *42 months, WP leader (UniTO coordinator)*

Strategic Research Grants, UniTO - Compagnia di S. Paolo 2014 - Smart molecular tools from the plant hormones Strigolactones to improve crop yields (STRItools). *24 months, PI*

AGER-SERRES 2013 - Selezione di nuovi portainnesti della vite resistenti agli stress abiotici mediante lo sviluppo e la validazione di marcatori fisiologici e molecolari. 36 months, Participant

COST Action FA1206 2013 - Strigolactones, biological roles and applications (STREAM). 48 months, Dissemination leader

Strategic Research Grants, UniTO - Compagnia di S. Paolo 2012 - Signaling role of strigolactones at the interface between plants, microorganisms and a changing environment (SLEPS). 36 months, Participant
